ABOUT RII FORUM 2027

Artificial intelligence, algorithmic decision-making, platform economies, and data-driven governance are reshaping organizations, institutions, education, and society. What once appeared to be a gradual process of digital transformation has evolved into a much deeper systemic shift: the algorithmic transition.

This transition creates unprecedented opportunities for innovation, productivity, and competitiveness while simultaneously raising profound questions concerning leadership, governance, human agency, ethics, learning, resilience, sustainability, and social cohesion. Organizations and institutions across sectors are increasingly required to redesign themselves while operating under conditions of geopolitical uncertainty, technological acceleration, economic fragmentation, and growing societal expectations.

Against this backdrop, Rii Forum 2027 provides an international interdisciplinary platform for discussing how organizations, governments, research institutions, businesses, and communities can successfully navigate this new reality.

Building on the intellectual legacy of previous editions of the Research & Innovation Forum, the 9th Rii Forum seeks to advance conceptually grounded, empirically informed, and practice-oriented debate on how leadership, learning, innovation, and management evolve under mounting uncertainty and accelerating technological change.

Rather than viewing technological transformation as an isolated phenomenon, Rii Forum promotes a holistic perspective recognizing that today's challenges are simultaneously organizational, economic, educational, political, social, environmental, and fundamentally human.

CONFERENCE THEMES

Rii Forum 2027 welcomes conceptual, empirical, methodological, and practice-oriented contributions addressing topics including, but not limited to:

- From Funded Research to Innovation, Transformation & Policy
- Artificial Intelligence, Algorithms and Data-Driven Governance
- Leadership, Organizations and Innovation Management
- Digital Transformation and Service Systems
- Learning, Higher Education and Human Capability
- Human-AI Collaboration and Responsible Innovation
- Smart Cities, Sustainability and Resilience
- Politics, Public Policy, Democracy and Regulation
- Research Infrastructures and Industry Collaboration
- Technology Transfer and Innovation Ecosystems
- Complexity Management and Decision Support Systems
- Regional Development and Comparative Case Studies
- Research Methods and Research Design
- Interdisciplinary contributions are particularly encouraged.

Springer SPRINGERNATURE Meteor

WHY TO ATTEND?

Rii Forum offers a unique opportunity to engage with an international community of researchers and practitioners working at the intersection of technology, innovation, management, and society.
Participants will have the opportunity to:

- present cutting-edge research;
- discuss emerging societal and technological challenges;
- engage with internationally recognized scholars;
- exchange ideas across disciplines and sectors;
- connect with industry leaders, policymakers, and research infrastructure professionals;
- establish international research collaborations;
- receive publication guidance from experienced journal editors;
- expand professional and academic networks;
- contribute to shaping future research agendas.

WHO SHOULD ATTEND?

Rii Forum welcomes participants from academia, industry, government, research infrastructures, and the non-profit sector interested in innovation, digital transformation, leadership, and societal change.

The conference is intended for:

- academics and researchers;
- early-career researchers;
- postdoctoral researchers;
- PhD candidates;
- practitioners and industry professionals;
- innovation managers and technology transfer specialists;
- leaders and staff of research infrastructures;
- policymakers and public administrators;
- representatives of NGOs and international organizations.

REGISTRATION FEES*

on-line: only the main author per paper
- early bird: 300 EUR
- regular: 350 EUR
- late: 400 EUR

on-site: the main author, accompanying author(s) 15% reduction
- early bird: 550 EUR
- regular: 650 EUR
- late: 700 EUR

on-line/PhD students: only the main author
- early bird: 300 EUR
- regular: 350 EUR
- late: 400 EUR

on-site/PhD students: no reductions for the accompanying author [illegible]
- early bird: 450 EUR
- regular: 550 EUR
- late: 700 EUR

FLAGSHIP EVENTS

Rii Forum combines academic excellence with interdisciplinary dialogue, international networking, and meaningful engagement between academia, industry, research infrastructures, and public policy.

Opening Keynote
An inspiring keynote delivered by an internationally recognized scholar or practitioner introducing the central theme of the conference.

The Rii Forum Round Table Debate: Research Infrastructures-Industry
A signature Rii Forum event bringing together leaders from research infrastructures, industry, government, and academia to discuss how science, innovation ecosystems, and business can jointly address pressing societal challenges and accelerate responsible innovation.

The Rii Forum On-line Panel Debate
The Rii Forum Online Panel Debate offers a venue where researchers, lecturers, knowledge-brokers, and practitioners may engage in an open and forward-looking conversation on key topics that define their daily concerns. It is open to all Rii Forum participants, thus bridging the on-line and on-site sessions, and creating a forum for exchange of ideas, networking and promotion of research excellence.

Meet the Editor
An opportunity to engage directly with editors of leading international journals, discuss publication strategies, and receive practical advice on preparing manuscripts for high-impact academic journals.

PhD & Early-Career Research Session
Dedicated sessions designed to showcase emerging scholarship while providing doctoral candidates and early-career researchers with constructive feedback and mentoring.

Special Sessions and Interdisciplinary Panels
Thematic sessions organized around emerging research topics, collaborative projects, and interdisciplinary perspectives addressing complex societal challenges.

Best Paper Awards
Recognition of outstanding scientific contributions presented during the conference, including awards for Early-Career Researchers.

Networking Reception & Conference Dinner
Informal opportunities to strengthen professional relationships, initiate new collaborations, and expand international research networks

PUBLICATIONS

- All papers presented at Rii Forum 2027, subject to double-blind peer review process, will be published in the Rii Forum 2027 proceedings; published by Springer, (Scopus-indexed). Please, check the publisher's website for details of the previous Rii Forum proceedings.

- line with what has become a good tradition now, the Rii Forum 2027 Chairs have ensured that several other publication opportunities are open to Rii Forum 2027 participants, including:
- Special Issues of international peer-reviewed journals (subject to editorial review);
- Edited volumes and additional publication opportunities associated with the conference.
- Detailed information regarding publication opportunities will be announced in due course.

IMPORTANT DATES

- Abstract Submission Opens: 1 September 2026
- Abstract Submission Deadline: 15 November 2026
- Notification of Acceptance: On a rolling basis
- Early-Bird Registration Deadline: 1 November, 2026
- Full Paper Submission: 30 December 2026
- Regular Registration Deadline: 30 December 2026
- Late Registration: After 30 December 2026
- Conference: 6 April 2027 (on-line) & 8-9 April 2027 (on-site)

Contact us at: info@rii-forum.org

RII FORUM 2027 | RESEARCH-TO-IMPACT TRACK — FROM FUNDED RESEARCH TO INNOVATION, TRANSFORMATION & POLICY

The Rii Forum Research-to-Impact Track provides a dedicated space for researchers, research consortia and innovation actors involved in EU-funded and other international R&D and innovation projects to present, discuss and disseminate their results beyond individual project communities.

Research and innovation projects generate new technologies, methodologies, prototypes, datasets, frameworks, business models and policy recommendations. Their longer-term value, however, depends on whether these results travel: from research to practice, from laboratories to organizations and markets, and from scientific evidence to policy and decision-making.

Reflecting the Rii Forum's commitment to real impact, the track brings together researchers with industry representatives, policymakers, public-sector leaders, innovation actors and other decision-makers. It thus creates a setting in which dissemination becomes dialogue around the applicability, transferability, uptake, scaling and further development of project results. This builds directly on the Rii Forum model of connecting academia, policymakers and the private sector and ensuring that research both informs and is informed by developments in business, society and the economy.

Bring your project results to Rii Forum! – not only to disseminate what has been achieved, but to discuss who can use it. See what comes next.!

The dedicated Research-to-Impact panels offer more than project dissemination. They provide participating projects with an opportunity to:

- increase the visibility of project results
- reach audiences beyond the consortium
- engage researchers from other disciplines
- communicate findings to decision-makers and practitioners
- receive independent feedback
- identify potential users, partners and follow-up collaborations
- explore replication, exploitation and scaling opportunities
- strengthen the policy relevance of project outcomes
- connect project dissemination with academic publication and sustainable networking
- extend the visibility and impact of results beyond the lifetime of the grant.

INDICATIVE TOPICS

The track welcomes ongoing and completed projects, individual project results and comparative contributions addressing, among others:

- R&D, innovation and emerging technologies – AI, generative AI, intelligent systems, data, digital twins, XR, advanced manufacturing and technology-enabled innovation;
- Industry 5.0 and organizational transformation – human-centric digitalization, new organizational models, resilience and technology-enabled transformation;
- Research commercialization and technology transfer – pathways from R&D to application, prototypes and demonstrators, spin-offs, research infrastructures and open innovation;
- SMEs, entrepreneurship and innovation ecosystems – technology adoption, competitiveness, scaling, regional innovation ecosystems and university-industry collaboration;
- Education, skills and human capital – upskilling and reskilling, AI-enabled learning, future skills and university-industry knowledge exchange;
- Green and digital transitions – circular economy, sustainable technologies, smart production, resource efficiency and digitally enabled sustainability;
- Public-sector innovation, governance and regulation – digital public services, responsible AI, institutional transformation and new regulatory challenges;
- Research-to-policy and evidence-informed decision-making – translating project results into policy recommendations, standards, roadmaps, guidelines and actionable evidence;
- Dissemination, exploitation and impact – stakeholder engagement, replication, scaling, sustainability and pathways to impact beyond the funded lifecycle.

ORGANIZATION

Conference Chairs

Prof. Anna Visvizi
SGH Warsaw School of Economics, Poland; Research & Innovation Institute, Poland
&
Prof. Luca Carrubbo
University of Salerno, Italy

Anna Visvizi, Ph.D. (dr hab.), prof., Vice-Dean of the SGH Doctoral School, Head of the International Economic Policy Department (ZMPE). Editor-in-Chief of Transforming Government: People, Process and Policy (TGPPP) & Digital Policy, Regulation and Governance (DPRG). Economist and political scientist, editor, researcher and political consultant with extensive experience in academia, think-tank and government sectors in Europe, including the OECD. The author of several published works (Elsevier, Routledge, Elgar Publishing, Springer, Emerald Publishing). Her expertise covers issues pertinent to the intersection of politics, economics and ICT. This translates in her research on applied aspects of ICT, including AI, in such domains as smart cities/smart villages, geopolitics, and innovation management.

Luca Carrubbo, Ph.D., Associate Professor, scholar of management and innovation at the University of Salerno (Italy). His research focuses on innovation management, service systems, complexity management, systems thinking, sustainability, and value co-creation, with particular emphasis on the Viable Systems Approach, Service Science and Service-Dominant Logic. He has participated in numerous national and international research projects spanning healthcare innovation, digital transformation, entrepreneurship, and research-industry collaboration. Professor Carrubbo has published extensively in leading international journals and edited volumes and has served as a visiting professor at several European universities. His work promotes interdisciplinary dialogue across management, innovation studies, service science, and public policy.

In collaboration with National Research Council (CNR) Institute of Integrated Methodologies for Earth Observation (CNR-IMIOT) represented by

Marcella De Martino, PhD, Research Director at the Institute of Integrated Methodologies for Earth Observation (IMIOT), National Research Council of Italy (CNR). Her research focuses on open innovation, sustainability, circular economy, value co-creation, research infrastructures, and the socio-economic impact of science and innovation. She has coordinated and participated in numerous national and international research projects and has published extensively in leading international journals. Dr. De Martino serves on the editorial boards of several international journals and actively promotes interdisciplinary collaboration among academia, industry, research infrastructures, and policymakers. As a member of the Rii Forum leadership team, she contributes to advancing dialogue on innovation ecosystems, knowledge transfer, and the societal impact of research.

Carmela Cornacchia, PhD, Technology Director at the Institute of Integrated Methodologies for Earth Observation (IMIOT), National Research Council of Italy (CNR). She is a physicist and her scientific background and research activities have been focused on the study and development of ground-based remote sensing applications for atmospheric research. She gained extensive experience in managing and supporting research and innovation activities through coordination and project management roles at regional, national, and European levels, including within public-private partnerships focused on remote sensing techniques applied to different contexts. She has long experience in managing preparation and implementation projects on Research Infrastructure. Currently, she is unit leader of Head Office of ACTRIS ERIC (Aerosol, Clouds and Trace Gases Research Infrastructure), in particular, SAMU (Service Access Management Unit) https://www.actris.eu/.

PAST ACADEMIC CHAIRS

Recognizing their contribution to the academic development and international standing of the Rii Forum:

Rii Forum 2022-2026
- Orlando Troisi, PhD, Professor, University of Salerno, Fisciano, Italy

Rii Forum 2026
- Johan Magnusson, PhD, Professor, University of Gothenburg, Gothenburg, Sweden; Director, Swedish Center for Digital Innovation (SCDI)
- Mara Grimaldi, PhD, Research Fellow, University of Salerno, Fisciano, Italy
- Radostaw Malik, PhD, Assistant Professor, SGH Warsaw School of Economics, Warsaw, Poland

Rii Forum 2025
- Enric Serradell López, PhD, Professor, Universitat Oberta de Catalunya (UOC), Barcelona, Spain

Rii Forum 2024
- Vincenzo Corvello, PhD, Professor, University of Messina, Messina, Italy

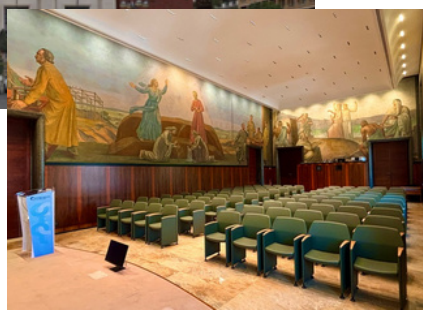

Rii Forum 2021
- Kawther Saeedi, PhD, Professor, King Abdulaziz University, Jeddah, Saudi Arabia

RII FORUM YOUNG LEADERS

Rii Forum Young Leaders advances early-career research excellence through skills development and integration into the Rii Forum international academic community.

- Krzysztof Karwowski, PhD candidate, SGH Doctoral School, SGH Warsaw School of Economics, Poland
- Cristina Cervino, PhD, Researcher, University of Naples Federico II, Italy
- Maria Giovanna Corrado, PhD, Researcher, University of Naples Federico II, Italy

JOIN US IN ROME

Rii Forum 2027 invites researchers, practitioners, policymakers, innovators, and students from around the world to explore how leadership, learning, management, and innovation evolve during the algorithmic transition.

Join us in Rome to exchange ideas, establish new collaborations, contribute to responsible and human-centered innovation, and become part of the growing international Rii Forum community.

THE RESEARCH & INNOVATION INSTITUTE (RII)

The Research and Innovation Institute (Rii) is an independent, international think tank and research platform founded in 2018 and chaired by Prof. Anna Visvizi. Based in Warsaw, Poland, the Institute promotes interdisciplinary research at the intersection of digital transformation, artificial intelligence, innovation, sustainability, governance, education, and public policy. Rii brings together academics, policymakers, industry leaders, and civil society representatives to generate evidence and develop practical solutions to today's complex societal and technological challenges.

Since 2019, Rii has established a strong international reputation through the annual Research & Innovation Forum (Rii Forum). Distinguished by its interdisciplinary scope and rigorous academic standards, the Forum provides a unique platform for scholarly exchange on emerging issues in digital transformation, innovation, governance, sustainability, and education. It brings together leading researchers, policymakers, and industry representatives to foster evidence-based dialogue and cross-sector collaboration. Its scientific excellence is reflected in the publication of peer-reviewed conference proceedings by Springer Nature, offering participants an internationally recognized venue for disseminating high-quality research and contributing to global scientific discourse.

To further strengthen its research capacity, Rii has established a Research Affiliates Program, bringing together an international network of accomplished scholars with complementary expertise across the Institute's thematic priorities. The Program fosters high-quality interdisciplinary research, stimulates new scientific collaborations, and supports the development of competitive national and international research proposals. By consolidating a community of affiliated researchers, Rii enhances its capacity to contribute effectively to collaborative research and innovation projects, including Horizon Europe and other internationally funded program.

Complementing its research activities, Rii has launched the Rii Young Leaders initiative to support the next generation of researchers. The program is designed to integrate early-career scholars into the international Rii research community, actively engaging them in the Research & Innovation Forum and related scientific activities. Through mentoring, networking opportunities, interdisciplinary collaboration, and exposure to high-quality academic debate, Rii Young Leaders helps participants strengthen their research capabilities, develop state-of-the-art academic skills, and build international research networks that support long-term scientific careers.

Rii's research and innovation activities focus on artificial intelligence and digital transformation, innovation ecosystems, smart cities and smart villages, sustainability and the Sustainable Development Goals (SDGs), governance, education, and knowledge transfer. Through its research, international partnerships, conferences, scientific publications, and capacity-building initiatives, the Institute contributes to evidence-informed policymaking and promotes innovation that advances sustainable, inclusive, and resilient development. More information: https://rii-forum.org/

NATIONAL RESEARCH COUNCIL – INSTITUTE OF INTEGRATED METHODOLOGIES FOR EARTH OBSERVATION (CNR-IMIOT)

The Institute of Integrated Methodologies for Earth Observation (IMIOT) is one of the research institutes of the Italian National Research Council (CNR). Headquartered in Tito Scalo (Potenza), Italy, the institute develops advanced methodologies that integrate satellite, airborne, drone, and ground-based Earth Observation data to study environmental and geophysical processes. (CNR)
Its research focuses on:

- Earth Observation and remote sensing;
- Climate and atmospheric sciences;
- Natural hazard monitoring and risk assessment;
- Environmental modelling and geospatial analysis;
- Sustainable management of natural resources and ecosystems;

CNR-IMIOT actively participates in major European and international research infrastructures and programmes, including Copernicus, ACTRIS, ICOS, and Horizon Europe, providing scientific expertise in environmental monitoring, climate resilience, and disaster risk management. More information: https://www.cnr.it/en/institute/055/institute-of-methodologies-for-environmental-analysis-imiot
